Forthcoming Meetings

Monday December 8 AGM
Monday January 12 CATS New Year Dinner
Monday February 9 TBD

CATS is twinned with the Crescenta Valley Radio Club
Glendale California USA www.gsl.net/cvrc

CATS November Meeting

This meeting re-introduced the CATS quiz, a feature that had been popular on many previous occasions. This year's event was no exception and we are very grateful to quizmaster Steve G7SYO for doing all the hard work.

Quizmaster Steve G7SYO at the keyboard

The assembled members, guests and one visitor new to the club (Phil M6EGI) grouped themselves into four teams as follows:

BT Pensioners: (Glenn G4FVL and XYL Yvonne, Andy G8JAC and Stuart G6CJR)

DJS: (Dave M0TRQ, Steve G3WZK and XYL Jenny, and Tom G4DFA)

Two Thorns And A Rose: (Gerry G8NNT and XYL Wendy, and Mike G6YOG)

Wooden Spoons: (Andy G0KZT, Ian M3IGP, Peter M0PWW and Phil M6EGI)

Steve G7SYO set exactly one hundred questions, divided into five rounds with twenty questions in each under the following topic headings:

Science and Nature
Entertainment
Geography
Pot Luck
Sport

After the first three rounds there was a break for refreshments. At this stage, DJS were in the lead with 36 points out of a possible 60, closely followed by Wooden Spoons on 33, Two Thorns and a Rose on 31 and BT Pensioners on 30. The most points that had been scored by any team in any round was by "Wooden Spoons" with 14 points in the round on Geography.

"Wooden Spoons" also excelled themselves after the break where they scored 13 points on Sport - the most points in any round by any team in Part Two of the contest. However, although they scored 56 points overall, the winners at the end of the fifth round were a team that had achieved a score in double figures in all five rounds - DJS with a total of 58 points. Steve G7SYO duly presented them with some chocolates as a prize.

The final scores are as follows:

BT Pensioners – 46 points
Two thorns and a rose – 49 points
Wooden Spoons – 56 points
DJS – 58 points

And again – a big vote of thanks to Steve G7SYO for providing such an entertaining evening to everyone who came along.

A selection of photos follows. For more photos see the CATS Facebook page.

CATS December Meeting **Advance Notice Of AGM**

Annual General Meeting Of The Society

In accordance with the rules of the Society, notice is hereby given that the Annual General Meeting of the Coulsdon Amateur Transmitting Society will be held on Monday 8th December 2014 at St. Swithun's Church Hall, Grovelands Road, Purley, Surrey CR8 4LA, commencing at 20:15 hours.

Now is a good time for all members to consider any issues they may wish to raise at the meeting and whether they might wish to nominate someone new, or perhaps stand themselves, for election to the CATS Committee.

Glenn G4FVL has announced that he will not be seeking re-election as a Committee member and that he also wishes to hand over responsibility for running the annual CATS Bazaar to someone else. Steve G3WZK has announced that he will be standing down as Secretary, so if you think you may be interested in taking on that or one of the other roles, please be sure to give it some serious thought before the AGM.

Serving on the committee is not as onerous as you might think, because most committee meetings are now run using Skype so that you can take part from the comfort of your own home. Please give it a thought. CATS needs YOU ...

As is usual, mince pies and wine will be provided at the AGM, as well as the more usual tea, coffee and biscuits.

We will also formally announce that the subs for 2015 are unchanged from 2014. Members are strongly encouraged to pay by bank transfer. Details of how to do this will be sent direct to all members.

The date for your diaries is December 8th 2014.

CATS 2015 New Year Dinner

The CATS New Year Dinner for 2015 will be at a new location. Previously called "The Plough, Bletchingley" this venue re-opened under new management and with a new name on 20th November. It is now called "The Bletchingley Arms" and is located on the A22, on the right hand side of the road as you travel from Godstone to Redhill. It is the first pub you encounter on reaching Bletchingley.

Full details have been sent to all CATS members.

The date for your diaries is January 12th 2015, 7:30 for 8:00 pm.

Kempton Park Rally Report

At this November's Kempton Park Rally CATS once more provided a Bring-And-Buy stand. The B&B was organised by CATS member Graham 2E0XDZ.

The Dark Corner of the hall that was home to the CATS B&B

Although the B&B was again sited in a somewhat dark corner of the hall, thanks to Andy G8JAC and Ian M3IGP who came well prepared with supplementary lighting, the situation was greatly improved compared with what it would have been without their help and expertise.

This year's B&B was one of the busiest for many years, with customers thronging several rows deep to see what was on offer, book in more, or make a bid for an item already on display. At least one person (a CATS member) sadly gave up the struggle to work his way through the crowd and see what was available, due to sheer weight of numbers.

Customers looking for bargains

Although the event was great fun to do and produced a useful addition to CATS Funds, some errors caused the final contribution to be less than would have otherwise been the case.

The B&B could not take place without the support of CATS members to set up and man the stand. So thank you to all who helped at the Bring-And-Buy, including the members who ventured outside to distribute flyers for the 2014 CATS Bazaar (see separate report below.)

Radio Fairs have announced the following two dates for rallies next year:

12 April 2015
8 November 2015

Many thanks to Graham for taking on the organisation of this event on behalf of CATS.

A further selection of photos follows. For more photos see the CATS Facebook page.

L-R: Stuart G6CJR, Andy G8JAC, Len G0GNQ and CAST B&B organiser Graham 2E0XDZ (G8NNT photo)

Also spotted at Kempton was Denis G0OLX, the repeater keeper of GB3NS (G8NNT photo)

CATS 2014 Bazaar

The queue to get in (G4FKK photo)

The 37th annual CATS Bazaar took place on a very rainy Sunday November 23rd. However, turnout was as buoyant as ever. Months earlier, there had been some doubt about whether the event would take place due to plans to redevelop the car park. Fortunately the event went ahead as normal – but only for this year (see below.)

A big thank you to all attendees for coming, to the CATS members who helped to set up on the Saturday, and to all who helped run the event and provide refreshments on the Sunday. And don't forget the hard work put in by Glenn G4FVL who organised the whole event on CATS' behalf so successfully.

L-R: CATS members Martin G4FKK, Steve G7SYO, and Glenn G4FVL – the event's organiser (G4FKK photo)

Next year the Bazaar will move to a new location at the Coulsdon Community Centre, Chipstead Valley Road, Coulsdon, Surrey, CR5 3BE. The date for your diaries is Sunday November 15th 2015.

A selection of photos of the event follows. These photos and several others appear on the CATS Facebook page.

L-R: Steve G3WZK, Stuart G6CJR (seated) and Peter M0PWW on the B&B stall at the CATS Bazaar (G4FKK photo)

New Member

CATS Whispers is pleased to announce that Graham Smith M3UQO has joined the Society. Graham lives in Banstead and his main radio interests include HF, computer control and software development. He is also interested in clay pigeon shooting, all aspects of IT, and Real Ale. A big CATS welcome to Graham!

The decline In 2 Metre Activity by Andy G0KZT

The 2 metre band, in my opinion, is one of the most exciting bands that we have the privilege to use. Equipment is easy to acquire and is affordable on even the smallest of budgets, especially with the influx of Chinese built rigs that sell for ridiculously cheap prices. Aerials can be small enough to put up in even the most restricted spaces. So why then do we find ourselves tuning across the band without hearing any activity?

When I became licensed in 1984, I only had the 2 metre band to play with. I saved my pocket money (at that time I was still in full time education and my only source of income was from my 7-day-a-week paper round) and brought my first rig, a Yaesu FT-290R MK1. Alan G6HC gave me a home built Slim Jim vertical to get started with and a local amateur (Gordon G1AEX) gave me a 6 element quad-driven Yagi beam soon afterwards. Members of CATS including Mike G6YOG and Richard G6AHR came round to my parents' house and helped me put the aerials up. Mike worked his magic on my mother when she exclaimed how large the array looked. His words of, "It will look a lot smaller when it's up" still make me chuckle today. And with the later purchase of a Microwave Module 144 MHz 30 watt amplifier, I was set up to work the band. Those aerials were to remain at the location until the great storm of 1987 when they were destroyed beyond repair.

I spent most of my time calling on the lower end of the band. SSB gave me an opportunity to work stations predominately in the Midlands and other northern towns, distances I had never enjoyed before. Contacts seemed so plentiful with often a dozen or more stations worked in a single evening. The upper end of the band was also popular and often it was difficult to find a clear 25 kHz simplex channel.

At that time, at least when I obtained my

G1IRM call, Citizen's Band had been legal for around 3 years and it is fair to say that the UK Amateur scene benefited from an influx of newly licenced stations that had become either more interested in improving their hobby or who had become disillusioned by the morons that found it fun to deliberately jam neighbouring stations. The mobile scene was also very popular with regular mobile nets springing up. Repeater activity was popular too although GB3SL at Crystal Palace suffered more than its fair share of "Squeekeys" that led to it eventually being shut down. That was a great shame in its own right as the location for the repeater gave it a pan-London coverage that could never be equalled.

The installation of equipment in cars seemed more commonplace then too. I even fitted a 7/8ths wave mobile whip to the back of my Honda C70 motorcycle when I first started working in Wandsworth, using the same FT290R slung over my shoulder. With a PTT switch mounted on the handlebars and a microphone fitted in the crash helmet this was the ultimate hands-free set up. A potentially serious accident put paid to those 2 wheeled days and, having passed my driving test, I was "forced" to use a car to do the journey. Every car of mine ever since has always had some Amateur Radio fitted into it - handy when visiting radio rallies such as Woburn.

My recollection of the band becoming quieter seems to be when Packet Radio started to become popular from the mid to late 1980's. This normally entailed hooking up the radio to a terminal unit (don't forget, Personal Computers were still very basic and expensive and the use of sound cards fairly uncommon) and leaving it running on one selected frequency. But it was soon after this that the RSGB began to move us to narrower 12.5 kHz channels to give greater room for simplex working. I must add that I don't blame Packet Radio for the decline, it was a mode of choice and led the way to the digital modes we enjoy today.

Another change was when the 'A' and 'B' licences were amalgamated into one. This gave access to HF for the first time to many Amateurs who had chosen not to take the Morse test, reducing 2 metre activity.

A decision was made when the Foundation and Novice licences were introduced to also allow, in most part, access to all of the HF bands. Again, this brought with it a new wave of Citizen Band users plus those who may

have struggled to attain the level of knowledge that the Radio Amateur's exam required. Perhaps some of these new stations had enjoyed working stations on 11 metres in near Europe and the attraction of the HF bands with the opportunity to speak with stations across the whole world on a bigger stage drew them towards HF and not to VHF/UHF. The question could well be asked what is the incentive to progress to a full licence, when your only restriction is a low power limit which is rarely enforced?

In my opinion, this is where the RSGB went wrong. By analogy with the time when 'B' licensees were restricted to 30 MHz and higher, I would argue that at the very least a similar restriction should have been invoked on Foundation licence holders. They could have gained some operating experience with maybe a 25 watt power limit and would have thus have an incentive to progress, if they chose to, to higher classes of licence. This would have populated the VHF/UHF bands to a greater degree and taken some of the pressure off the more popular bands such as 40 metres.

The VHF and UHF contest scene is still very popular, especially the Tuesday evening series of contests. These events demonstrate the bands' true capabilities under what are most often "flat" conditions, similar to those I enjoyed in my early days. But these peaks in activity are only when contests are running, or at least, that's my perception. However, persistent calling on the SSB calling frequency does generate results, even with just my omnivertical. It just seems that someone has to break the silence! I think this could also be said to be true with respect to 4 metres, another band of great potential.

In the coming months when I can get my beam up on my mast, I am going to focus on the lower end of 2 metres to test my theory. When I'm in the shack, I plan to leave the rig running putting out regular CQ calls on the autocaller and see what results I get. Is the band really that quiet or is it just that there are a lot of people listening and not calling? I shall wait and see!

CATS Contests Participation In 2015

It is intended to discuss CATS participation in contests during 2015 informally at the AGM after conclusion of the Society's main

business. For people unable to attend the AGM, please contact any committee member with your views on contesting.
